At KJM Stones, we bridge the gap between global stone sources and local design excellence. As a direct importer, we eliminate the middleman to provide designers, builders, and architects with first-selection access to the world's most sought-after natural stones and premium quartz.

Our 10,000 sq. ft. local distribution center is more than just a warehouse—it is a curated inventory of slabs, specifically selected for their unique veining, structural integrity, and architectural appeal. By maintaining a massive, on-site inventory, we offer our trade partners:

Lot Continuity: Consecutive, book-matched slabs ready for high-impact waterfall islands and feature walls.

Immediate Availability: No international lead times; your stone is inspected, tagged, and ready for your fabricator immediately.

A Professional Showroom Experience: A climate-controlled environment where you and your clients can view full-sized slabs under optimal lighting to ensure the perfect match for your vision.

We are committed to being your technical partner, ensuring that every piece of stone we import meets the rigorous standards required for luxury residential and commercial projects.

About us

Introducing Gunjan, Co-Founder of KJM Stones

At KJM Stones, we are dedicated to assisting individuals in selecting the perfect stone for their homes, guided by honesty, warmth, and practical experience. Our mission is straightforward: to make high-quality stone accessible, beautiful, and an integral part of daily life.

"KJM Stones was not established in a day — it evolved from a lifelong passion for natural stone."
